*Great quality material...and the great part  
about the Ancient Future releases and the  
solo projects is that they continue to be  
great catalog airplay items long after the  
promotional window and charting peaks.*

*The Mariah Parker CD just cracked our  
top ten jazz charts*

*I am particularly fond of the Matthew  
Montfort (CD): reminds me somewhat  
of the more acoustic offerings Chick  
Corea has been doing lately. Maybe a  
touch of Will Ackerman also.*

*I'm an indie label rock guy at heart who was given the task of building a world music library & rotation over a year ago & listen to a fair amount of 'world' music that doesn't move, touch or inspire me.*

*I'm pleasantly surprised by the cds you sent and really appreciate the blending of different musical traditions and cultures to create something new.*
